PROFESSIONAL SUMMARY

Senior Analytics Engineer with 6+ years bridging analytics, ML, and AI tooling across telco and mobility. Specialize in building LLM-augmented analytics agents, experimentation frameworks, forecasting pipelines, and the SQL/data infrastructure that powers business decisions at scale.

CAREER HIGHLIGHTS

- **Business Impact:** Contributed to **\$20M+** in client revenue across telco and mobility, including **\$10M** lifted on Telefónica Spain through Bayesian pairing models validated via controlled A/B experiments.
- **AI-Powered Tooling:** Shipped an **LLM-powered analytics agent** that handles queries, charts, and summaries on demand, reducing executive data requests by 40%+ and accelerating internal decision velocity.
- **Top Performer:** Recognized in the **top 10%** of Afiniti employees for **4 consecutive years** for technical leadership and revenue impact.

EXPERIENCE

Analytics Engineer, SadaPay — Remote

Mar 2026 – Present

- Owning **end-to-end data operations**, financial reporting automation, and self-serve tooling for operational and executive teams.

Senior Analytics & Automation Lead, Careem (Uber) — Dubai/Remote

Mar 2025 – Mar 2026

- **Experimentation:** Designed and executed an **A/B test on a new preferential care policy** in partnership with Care team stakeholders, communicating results to leadership that led to a **2% lift in on-time deliveries** and improved ETA adherence.
- **Business Intelligence:** Built interactive **Superset dashboards** measuring defect rate across markets, surfacing insights that helped reduce defects by **1%** across operations teams.
- **Conversational Analytics:** Built an **LLM-powered agent** that answers ad-hoc data questions with queries, charts, and written summaries, reducing executive data requests by **40%+** and freeing analyst capacity for higher-leverage work.
- **Forecasting & Optimization:** Built a real-time supply-balancing system combining **LSTM and gradient-boosted forecasting** with reinforcement learning to generate targeted driver incentives, **cutting incentive campaign costs by 60% at WMAPE <10%**.
- **Workflow Automation:** Built a Slack-integrated approval flow with checkpointing and state recovery to ship the supply-balancing system into ops workflows, **reducing manual execution time by 90%** while maintaining safety guarantees.

Senior Data Scientist, Afiniti Software Solutions — USA/Remote

Mar 2020 – Mar 2025

- **Experimentation & Revenue Lift:** Productionized pairing models that lifted client revenue by **5%** across multiple accounts, validated through **controlled A/B experiments** with rigorous statistical testing.
- **Revenue Forecasting:** Built a 90-day forecasting pipeline with **85% accuracy** from 3-day behavioral signals to flag early-stage churn and automate **LTV reporting** for executive stakeholders.
- **Production Analytics at Scale:** Led a team of 4 to deliver **\$10M annual revenue lift** for Telefónica Spain; analytics pipelines supported **~500K real-time decisions/day** on Afiniti's 24/7 production platform.
- **Causal Inference:** Quantified the impact of football matches on caller behavior using time-series analysis, improving model accuracy by **2%** through better treatment of exogenous events.
- **SQL & Data Pipelines:** Optimized multi-stage **PostgreSQL/MySQL** attribution logic, improving outcome-to-call match rate by **8%** and reducing processing latency by **40%**.

TECHNICAL SKILLS

SQL & Data Engineering: PostgreSQL, MySQL, Redshift, Complex Joins, Window Functions, Query Optimization, Data Modeling, ETL Pipelines, Workflow Orchestration

AI & LLM Tooling: LLM Agents, LangGraph, LangChain, ReAct, Text-to-SQL, RAG, Prompt Engineering, Embeddings, OpenAI/Anthropic APIs

Experimentation & Analytics: A/B Testing, Hypothesis Testing, Causal Inference, Power Analysis, Cohort Analysis, LTV Analysis, Experiment Design, Statistical Modeling

Dashboards & Visualization: Apache Superset, Tableau, Power BI, Shiny, Excel

Programming & ML: Python (pandas, NumPy, scikit-learn, PyTorch), R, Bayesian Inference (MCMC, Stan), Gradient Boosting (XGBoost, LightGBM), Time-Series Forecasting, NLP

EDUCATION

Bachelor of Science, Electrical Engineering

Lahore University of Management Sciences, 2019
